Global Corporate & Commercial

Global Corporate & Commercial are pleased to invite you to join us for an afternoon seminar on extreme weather:

In the past 2 years, the insurance industry was suffered by numerous extreme events including Typhoon Hato and Typhoon Mangkhut, which caused widespread flooding and damage across the region. The compounded effects of wind and storm surges have driven large amount of claims for property damage and business interruption. As global warming continues to affect us, powerful hurricanes and typhoons are set to become more frequent near the future. These extreme events may become the norm in the future. So the big question is: how can the insurance industry cope with the rising impact if extreme weather's condition?

Main themes of the seminar:

- Typhoons history and increasing extreme weather phenomena, lessons learned and future challenges
- Observations on Typhoon Hato and Typhoon Mangkhut
- How can the insurance industry help? – Claims handling between Hato & Mangkhut
- Build up to the Typhoons and key differences
- Comparison in claim types between Hato and Mangkhut and relative impact in HK and Macau.
- Common challenges experienced in managing the event and the large influx of claims.
- Coverage considerations for PD and BI losses
- Business of adaptation and building climate resilience in Asia
